Telecom Engineer

EQT Corporation
550 Eagan Street
Charleston, WV 25301

Date : 12/19/2011

To whom it may concern,

This EQT Midstream transceiver system requires professional installation; professional installers and end-users will be provided with the appropriate information for satisfying RF exposure compliance. This product does not employ unique RF connectors.

This system requires custom configuration and assembly by the professional installer, as outlined in the product user's manual. This system will be installed by experienced professional installers who are familiar with radio frequency (RF) equipment operation as well as local building and safety codes.

Furthermore, this device will be installed for use in industrial or commercial settings only, for example by electric power utilities, oil and gas exploration and transmission companies, railroad companies, federal, and or state agencies. This product will not be sold retail, to the general public or by mail order.

It is installed only by professionals employed or contracted by EQT Midstream.

EQT Corporation

Sincerely,

Roger A. Casto
